## EDUCATION

2014 - 2019  
**BS Electronics Engineering**  
Saint Louis University  
(Baguio City, Philippines)  
▪ Dean's lister for a total of 8 semesters

## SKILLS

**Development**  
HTML, CSS, JavaScript, Typescript, Astro  
React, NextJS, NodeJS  
Material UI, Tailwind, Redux, Prisma, Zod  
**Design**  
Figma  
Adobe Photoshop  
Response Web Design  
**Others**  
Agile Methodology  
Version Control (Git)  
Vercel, PlanetScale

## LICENSES

2019  
**Electronics Engineer**  
Philippine Professional Regulation Commission  
2019  
**Electronics Technician**  
Philippine Professional Regulation Commission

## CERTIFICATIONS

2021  
**Testing React with Jest and Testing Library**  
Udemy  
2020  
**Modern React with Redux**  
Udemy

# KEVIN VON ERICH D. PEREDO

## FULLSTACK DEVELOPER

A fullstack developer with three years of experience in building and maintaining performant and responsive web applications. Proficient in languages like HTML, CSS, JavaScript, React.JS, Typescript, NextJS, and NodeJS and general processes in software development. Passionate in building elegant and functional UI interfaces and exploring bleeding edge technologies.

## EMPLOYMENT HISTORY

**Junior Software Engineer** May 2021 - Present  
Lexagle Inc. (Makati City, Philippines)  
▪ Working closely with product managers to translate business requirements and user stories into new features and optimizations for the Lexagle platform and UI/UX designers to translate mockups and prototypes to working UI interfaces  
▪ Design, implement, maintain a design system library, based on the Lexagle's brand identity, which is used throughout the platform  
▪ Perform bug fixes and code reviews, participate in the product development cycle, and collaborate with team members to implement features and changes to the web application  
**Software Engineer** Feb 2020 - April 2021  
SQREEM Technologies Pte. (Quezon City, Philippines)  
▪ Designed and developed performant web applications, based on design wireframes, for commercial and internal use, using both open-source and proprietary web technologies  
▪ Used skills in debugging to check, refactor and optimize codebases to enhance user experience of web applications  
▪ Suggested trending and tested web technologies that could minimize development time, optimize existing applications, and provide efficient web development

## PROJECTS

**Dental Records** March 2023  
Web App  
▪ An app to store and view dental records. Technologies and tools used are React, Typescript, NextJS, Tailwind, Prisma, tRPC, and NextAuth.  
**Astro Personal Portfolio** March 2023  
Web App (kevinperedo.dev)  
▪ An Astro-based web portfolio. Technologies and tools used are React, Astro, Tailwind and Zod.  
**NextJS Personal Portfolio** March 2021  
Web App  
▪ A Next.js personal portfolio. Technologies and tools used are Next.js, React, Typescript, Framer Motion and CSS Modules.  
**Noterist** Sept 2020  
Web App (kp-noterist.web.app)  
▪ A note-taking app using React and Redux, designed in Figma, and deployed using Firebase
